CS Core: Object Oriented Programming, DBMS, Operating Systems, Computer Networks

Professional Experience

Rosenblatt Securities

September 2023 – Present

Full Stack Developer

Noida, India

- Contributed to end-to-end development of multiple **internal platforms** powering **trading, compliance, and client-facing** operations at a boutique **tech-driven investment bank** and **institutional brokerage** firm with the **largest NYSE floor presence**, leveraging **ReactJS, NodeJS, ExpressJS, and MySQL** to deliver secure, high-performance solutions where **data integrity** was critical for **trade execution** and regulatory workflows in a high-volume trading environment.
- Delivered **35+ key features** across various portals, including **user management modules, customizable layouts, and data-driven dashboards** that reduced operational overhead by **30%** and improved workflow efficiency for **50+ internal users** spanning **trading, compliance, and client servicing** teams.
- Enhanced platform interactivity by implementing **interactive tables, real-time charts, and dynamic components**, increasing data accessibility and enabling **faster decision-making** with insights refreshed every **60 seconds**.
- Managed and optimized backend infrastructure by maintaining **Python** and **Perl** automation scripts for **daily market data ingestion** from **15+ external sources**, ensuring **99.9% system uptime, real-time database updates, and zero tolerance** for data inaccuracies in compliance-critical environments.
- Part of a trading technology organization supporting record-breaking volumes, with the firm executing over **378 million shares** and **\$20.5 billion notional** traded in a single day during peak market activity — reflecting the scale, resilience, and trust placed in our systems by institutional clients.

Internships

ClikinTech

July 2023 – August 2023

Web Development Intern

Remote

- Contributed to the development of an **e-commerce platform**, building and optimizing features to improve **user experience, performance, and responsiveness** across devices.
- Translated **Figma designs** into clean, reusable code while collaborating with designers and adapting to evolving client feedback in a fast-paced delivery cycle.

Integrella

January 2023 – February 2023

Junior Software Consultant Trainee

Ahmedabad, India

- Contributed to a client-facing **integration platform** for a UK-based education services provider, leveraging **ReactJS, NodeJS, ExpressJS, and MongoDB** to build modular frontend components and RESTful APIs.
- Completed multiple hands-on projects during the training period, strengthening skills in **API development, microservices architecture, and enterprise-grade integration patterns**.

Projects

RescueMeals — MongoDB, ExpressJS, ReactJS, NodeJS, JWT

June 2023

- Developed a FullStack application for food waste management and redistribution for underprivileged communities.
- Created a platform connecting restaurants with volunteers and NGOs to reduce food waste and address hunger issues.

GutarGu — NodeJS, Firebase

October 2022

- Built a chat room web application using ReactJS, enabling users to share resources (images) and interact in real-time.
- Implemented user authentication and message storage using Firebase, a NoSQL database solution.

Education

DAIICT Gandhinagar

August 2021 – June 2023

Master of Science in Information Technology

Gujarat, India

HPU Shimla

May 2017 – September 2020

Bachelor of Science in Mathematics

Himachal Pradesh, India
